International Head Quarters,
The SPARK Group.

The SPARK License (version 1.0)

The SPARK Group believes in the power of collaborative development and the importance of ensuring that innovation benefits everyone. Founded to foster international collaboration in the Strategic Pursuits of the Advancements in Research and Knowledge, the SPARK License is designed to form a vibrant community where creators are recognised and protected under copyright, and their contributions - alongside derivative works - remain freely accessible and modifiable by all, under terms that uphold the collective ownership of the SPARK Group.

Core Principles

The SPARK License is founded on the following core principles:

1. Collective Ownership: International copyrights are retained by the author, rights to property licensed under The SPARK License belong to The SPARK Group collective. This means that all members of The SPARK Group, both current and future, share in these rights.
2. The Philosophy: The SPARK License is a license granting creative freedoms. This means that any property distributed under The SPARK License, and any derivative works created from it, must also be distributed under the terms of The SPARK License. This ensures the continuous freedom and openness of the SPARK ecosystem.
3. Community Expansion: Any individual or entity that produces property under The SPARK License and signs the associated SPARK Licensing Agreement (SLA) automatically

DO NOT DISPLAY, DEFACE, OR DISSEMINATE

THE SPARK GROUP
THIS DOCUMENT IS PROTECTED UNDER LAW

becomes a volunteer member of The SPARK Group. There is no requirement for work or active participation, but rather an invitation to join the collective's shared vision.

4. Formal Agreement: All property released under The SPARK License requires a formal SPARK Licensing Agreement (SLA) to be signed. This SLA must be duly executed by both the creator(s) of the property and The SPARK Group Licensing Board. This dual signature ensures clear understanding and adherence to the license terms.

5. Attribution Requirement: To maintain transparency and acknowledge the contributions of all creators, any derivative work released under The SPARK License must explicitly cite all works it derives from. This ensures a clear lineage of development and proper credit for original contributions.

Licensing Your Property with the SPARK Group

To license your property under The SPARK License:

1. Ensure your property aligns with the principles outlined above, particularly regarding philosophy and attribution.
2. Contact The SPARK Group Licensing Board to obtain the official SPARK Licensing Agreement (SLA).
3. Review and sign the SLA, returning it to ensure it is also signed by The SPARK Group Licensing Board.
4. Include The SPARK License file (or a clear reference to it) with your property distribution.

Thank You,

– Geordie Mac, The SPARK Group.
